

WHAT'S GROWING IN THE VEGETABLE GARDEN?

The Barnsley Beds are a beautiful display of fruits and vegetables found on a farm.

Can you find these crops growing in the Garden?

The crops growing in the garden attract many insects - both friend and foe. Can you find an interesting insect visiting the organic crops? Draw your favorite garden creature here.

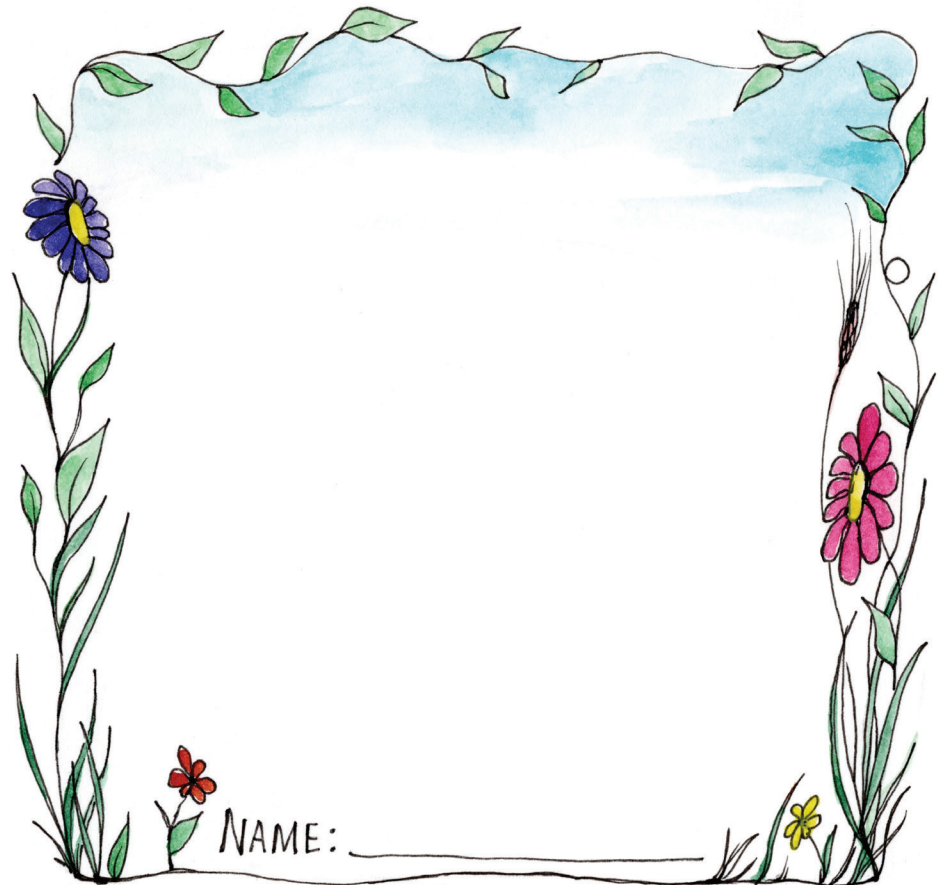

NYBG

MY DAY AT THE GARDEN

As you explore NYBG with your family, use this Field Guide to record and remember what you find.

Draw a picture of your day at the Garden here:

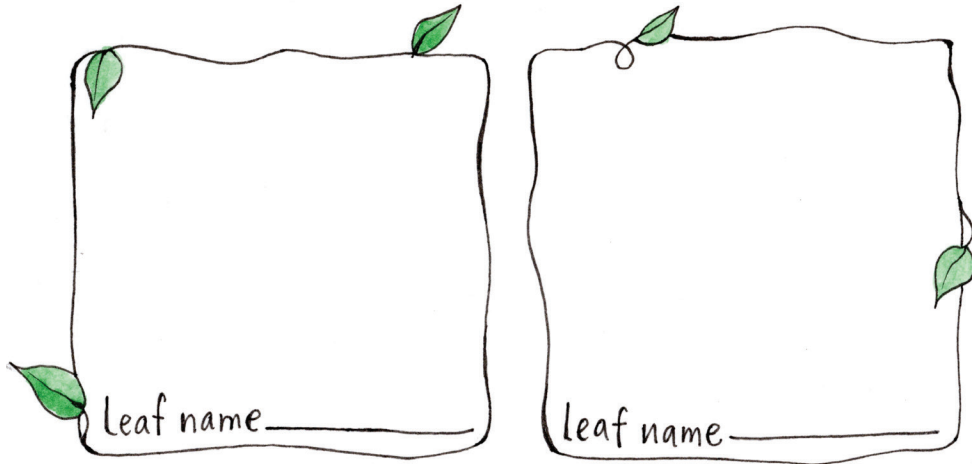

NEW YORK BOTANICAL GARDEN

LEAVES! LEAVES! LEAVES!

Many different types of trees live in the Thain Family Forest, and all have different shaped leaves. Look around the forest and find two interesting leaves to draw. Use the key below to help identify the ones you choose.

Look around the forest; choose a leaf to draw.

Key

Notice that all plants have two names: a common name and a scientific name. Scientific names are always in Latin so scientists from anywhere in the world can talk about plants using the same language.

Red Oak
Quercus rubra

White Oak
Quercus alba

Sweetgum
Liquidambar styraciflua

Sugar Maple
Acer saccharum

American Beech
Fagus grandifolia

Sweet Birch
Betula lenta

Shagbark Hickory
Carya ovata

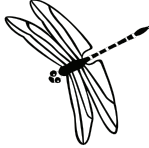

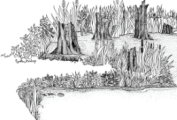

Tulip Poplar
Liriodendron tulipifera

SUMMER NATURE HUNT

As you walk around the Native Plant Garden and the Wild Wetland Trail, you'll see many different grasses, flowers, insects, animals, and natural objects.

How Many Can You Find?

✓ Check four in a row (up, down or diagonally)
